

# Technical Materials

## Composite Structures

Because Neenah Technical Materials products are specifically engineered for performance, strength and versatility, they are the smart choice to be used in surface veils and matrix materials. Materials include traditional and high temperature polymers, conductive materials and natural fibers.

		Materials of Composition		Applications	
	Fiber	Binder System		Surface Veil	Matrix Materials
		Standard	Special		
<b>Craneglas</b>					
230	Electrical Grade Glass	PVOH	Upon Request	X	X
330	Electrical Grade Glass	PVOH	Upon Request	X	X
<b>Cranemat -- Traditional Polymers</b>					
SR	100% Polyester (PET)	None		X	X
CB	Bicomponent PET/PE	None		X	X
CU	Calendered PET	None			
RS	Calendered PET	None		X	
RC	Calendered PET	None			X
SC	Calendered PP/PE	None			
<b>Cranemat -- Harsh Environment / High Temperature Polymer</b>					
CC	Poly Phenylene Sulfide	PVOH		X	X
